Python for Mathematicians and Statisticians

List of Workshop Participants

Paper ID (ICMSA 2020)				Student ID (UTAR)
232812	232809	232936	232770	1601626
232793	232930	232755	232772	1700597
232774	232927	232913	232779	1700103
232934	232766	232915	232820	
332500	232735	332501	232700	
232869	232738	232846	232856	
232751	232741			

Preparation Guidelines

- This workshop will be conducted by using Colab Notebook from Google.
- It is optional for the workshop participants to setup for Spyder and Python on personal PC.
- Workshop participants may choose to use their own Jupyter too.
- All accessible links for notebooks will be provided during the workshop.
- Participants may prepare to attend this workshop by referring to the below **Pre-Handouts**:
 1. Introduction to Google Colab
 2. Module Installation in Python
 3. Python Setup with Anaconda
 4. Run .py in Spyder and Cmd
- Participants may attempt to execute the above-mentioned topics of the **Pre-Handouts** before attending this workshop.

Remarks: The above-mentioned **Pre-Handouts** will be emailed to all workshop participants.
